

Signago Bot Whitepaper

Introduction

Signago Bot is a cross-chain Telegram bot designed to empower cryptocurrency traders with real-time monitoring and analytics tools. Our platform supports multiple blockchain networks including Solana, Ethereum, Base, BSC, Polygon, and TON, enabling users to track price movements, market cap changes, and discover trending tokens effortlessly.

Vision

To create a decentralized, community-driven ecosystem where every trader has access to professional-grade tools for monitoring and evaluating cryptocurrencies.

Core Features

Monitor Tokens

Users can monitor tokens across supported chains by inputting the contract address and selecting the alert condition:

- Price threshold
- Percentage increase or decrease
- Market cap

Watchlist

Each user has a persistent watchlist stored in our secure database, allowing for easy tracking and re-monitoring of favorite tokens.

Top Monitored Tokens

The bot aggregates and displays the most tracked tokens in the community, offering insights into crowd sentiment and momentum.

Leaderboard

A real-time leaderboard ranks the top gainers and losers over a 24-hour period among monitored tokens.

Admin Panel

Bot admins can broadcast messages, post advertisements, and manage user interactions directly within the interface.

How It Works

1. Start the bot via Telegram.
2. Choose "Monitor" to track a token.

3. Enter contract address and select chain.
4. Choose alert condition (price, % change, market cap).
5. Get notified when conditions are met.

Token Launch Announcement

We are excited to announce the launch of **\$SNB**, the official utility token of Signago. It will serve as the backbone of our platform, enabling access to premium features, governance, and staking rewards.

- **Token Symbol:** \$SNB
- **Contract Address (CA):** Coming Soon
- **Buy on Raydium:** [Raydium Swap](#)

Roadmap

Quarter Milestone

Q2 2025 Launch of \$SNB token and liquidity pools on Raydium

Q3 2025 Staking and community governance features

Q4 2025 AI integration and support for more EVM-compatible chains

2026 Full launch of the Signago DeFi suite with cross-chain trading tools

Tokenomics

Allocation	Percentage
Pool	70
Community & Airdrop	5%
Bot Development & Team	20%
Listings and Marketing	5%

How to Buy (Using Phantom Wallet)

1. Install the Phantom Wallet extension and create a wallet.
2. Fund it with SOL.
3. Go to [Raydium Swap](#) and connect your wallet.
4. Enter the \$SNB contract address.
5. Swap SOL for \$SNB and approve the transaction.
